	Urgent	Not Urgent
Important	• Implement 2-player Wordle with custom secret words and word lengths. • Develop accurate letter feedback. • Implement a six attempt limit and win/loss detection.	• Add automatic role switching after each round. • Implement a scoreboard that tracks wins. • Implement a points system based on number of guesses.
Not Important	• Add dictionary validation (API) to ensure real words are entered. • Use colored letters (green, yellow, grey) to enhance guess feedback. (ANSI Escape codes) • Generate random words for optional single player.	• Creating an online multiplayer system • Using a complex graphical user interface instead of a command line interface • Adding animations and sound effects.
